Should support mouse and keyboard :(this game just sucks, i mean it was cool at first but after a while the music just cuts out randomly and you get this awkward silence til the end of the match

also the ai in the can be beaten pretty easily if you just force you guys and the ball into the field goal. Simple and fun. Has lot of different modes to keep things interesting. Some of the powerups look REALLY bad because they are really jarring against the rest of the game which is more pixelated. If some of the graphics were improved, this game would be even better.. Okay, here we go! This game is the best underrated game here! Well, there's no action with mouse, but that's not a big deal! Kill everything, stay alive, complete dungeons, repeat! And have nice time with this game, because you should! And btw, R.I.P my friend's cat. He didn't have enough time to kill me.... This game is fun, challenging, but fun. The closest thing I can think of to compare this with is Super Hexagon, but with arrow keys instead of your mouse. The only downside is that the music is REALLY slow, in my opinion they should either change it to something fast paced or let us choose our own.. This is a lot more difficult than I expected. It's fun and simple, run around in a tank shooting. Try to kill the rpg men as soon as you see them and don't forget there are upgrades in the workshop.. TRIED TO NOT GET HIT INTO A LETTER.

CAN FIND BETTER GAMES ON FACEBOOK.

BOUGHT FOR £0.50, SOLD ONE = TRADING CARD FOR £0.40...

PROFIT???. I cried while watching the videos of ROTK and S4, even though I had known the ending a year ago.

And they'll make me concentrate myself on DOTA many many more.. full of bugs

Yup. It works just fine.. Great game, great story, very takes time 10V10. Great game, easy to play for everyone, The price is also just right no need to wait for sale. i would like it but no customers come and i dont get money so for now it would be a thumbs down but if its fixed i will do a thumbs up. This game is so funny!. Pointless and unrewarding. Very retro game, but a bit unstable, and it doesn't quite do justice to its name and what it implies.

It is a very simple drawn god sim, where you first create land in an infinite oceanic environment, where then 2 survivors are added. Then its just a matter of building houses, farms, mines and whatnot to facilitate the production of resources needed to feed the inhabitants and the expansion of your settlement.

Like I said, the graphics are very simple, as is the sound V music. As is the interface, but I would even go further than just calling it simple, as it is lacking as well; Some resources are simply not shown and others are insufficiently elaborated.

The help gives you some idea, but a lot of functionality simply doesn't seem to be in the game, such as the upgrading of buildings. I got 1 building to try to upgrade, followed by a game crash...so...ya...there's that...

Might be something for the collectors out there that want a simple island editor, which is all it seems to be (again, you need to actually create the island yourself), for a 5 minute break at work or something, because that is really all it is good for...

It seems like a project for a beginning developer (and one that has a LOOONG way to go), which is in itself not a bad thing. But maybe it could use some more work, or not be made available to the public, or at least not Steam. This may not be the right platform to publish this early work on. There are a lot of communities and platforms out there that this sort of thing is great for, but Steam users generally expect a little bit...more...

1000+ Positive Reviews!:

CS2D received over 1000 positive reviews within just 1 week after its Steam launch! Overall the rating is very positive.

Incredible 92% of all reviews are positive!

Moreover CS2D was activated nearly 220k times and over 173k players installed and started CS2D! The current peak of concurrent players is 1440!

Thanks to everyone for making these great numbers possible!

By the way: If you like the game feel free to nominate it for the Steam awards! ;). **Roundup: 15 days CS2D on Steam!:** CS2D has been released on Steam 15 days ago. Over 335,000 free licenses have been distributed via Steam and we have over **275,000 first time installs with recorded playtime!**

Over 2,280 players reviewed the game and over 2,100 of these reviews are positive. We managed to stay at the amazing level of **92% positive reviews!**

We released 3 patches in this time and we are working on further improvements and bug fixes which we will release ASAP!

Also stay tuned for a fan made Korean translation! Special thanks to Zeisen (U.S.G.N. #53832)!. Half A Million Installs With Recorded Playtime:

CS2D recently surpassed the **500,000 Steam installs** (first time downloads with recorded playtime) mark. It's actually 515,441 already right now! This means that more than half a million different people installed and played CS2D via Steam in less than 2 months!

Thank you for these amazing numbers! 🤖. **CS2D 1.0.0.7:**

I'm happy to announce that CS2D 1.0.0.7 has just been released!

Note: There was a corrupted update depot for a short time frame. Please restart Steam if you have trouble updating CS2D!

Changelog. **CS2D 1.0.0.5 LIVE ON STEAM!:**

With CS2D version 1.0.0.5 we now have the first CS2D version LIVE ON STEAM! We hope you like the release!

By the way: Everyone who does not have Steam can still get full access to the game via the normal standalone client.

Servers are shared between Steam and Non-Steam version. This means everybody can play on every server.

We highly recommend to use the Steam version though as it comes with additional features and **OVER 50 amazing Steam achievements!**

Thanks to everyone for the amazing support!

Enjoy playing! 🤪

CS2D 1.0.0.5 Changelog. **CS2D 1.0.0.5 Patch 3:**

Whaaaaat!? Another patch? Already?! Hooray!

Because of the amazing launch we're giving you **10 new weapon achievements**, easier language switching and some other stuff! Plus we even fixed a few things! Yay!

Changelog. **CS2D 1.0.0.5 Patch 2:**

Another small patch. We encountered a problem with server list caching which can have a negative impact on performance. We also added OpenGL VSync with this patch and hope that it doesn't break everything.
