coaches Poly[[diaquabis[μ-4,4'-(bis(dithiobutylamino)methylene)salicylaldiminato]platinum(II)] perchlorate. In the title compound, [Pt(C₃H₆NO₂)₂(C₅H₆N₂S₂)], the neutral chelate ligand is virtually planar. The central Pt atom is located on a twofold axis with an N-Pt-N angle of 104.93 (4) degrees. Proteomic analysis of rat hippocampus after administration of conditioned medium derived from glioblastoma cell line U87MG. We identified proteins that are present in the conditioned medium derived from glioblastoma cell line U87MG, and found that these proteins may play important roles in the brain. These conditioned medium (CM) proteins were purified using anion-exchange chromatography and then analyzed by MALDI-TOF-MS. Several proteins, such as angiogenin (AGN), kininogen-1 (KNG-1), urokin 82157476af
